

4 Ways to Prevent Fly-Tipping

1. Fencing and Barriers

Erect robust fencing or barriers to restrict access. This tactic is particularly effective in rural areas where fly-tippers often target secluded land.

Surveillance and Lighting 2.

Deploy a wireless CCTV system and improve lighting.

3. Effective Signage

Use signs to warn against illegal dumping, citing the potential fines and legal actions as per the UK's Environmental Protection Act.

Community Engagement 4.

Engage with local councils and neighbourhood watch groups. Reporting suspicious activities to the local authorities can help prevent fly-tipping.
